

Audyssey MultEQ-X Pro

Powerful Room Equalization for A/V Businesses and Installers

Audyssey MultEQ-X Pro is the professional version of MultEQ-X tailored specifically to A/V businesses and installers. MultEQ-X Pro has all the same great calibration technology as MultEQ-X, but adds important business-to-business features, including a simplified license management system, discounted bulk pricing, a dedicated Pro website, and live phone support from Audyssey sales and engineering staff.

MultEQ-X Pro is sold and distributed directly by Audyssey. It is a completely separate application from MultEQ-X, and no Microsoft account is required.

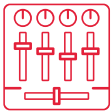

Frequency Responses

Compute measurements with detailed frequency responses for individual channels for easy room tuning

Cutoff Mode

Design advanced curves with new "Cutoff Mode" control, as well as complete control over target sound for every channel and every preset

Subwoofer-Level Adjustment

Enjoy subwoofer-level adjustment with slow and super-slow time rates

Manual Option

Manual override of all automatically detected parameters

Audyssey Pro Installer Kit

The Audyssey Pro Installer Kit is the definitive calibration solution for professional A/V installers. Featuring Audyssey's highest-quality microphone, as well as a pre-amp, stand, mount and cables, the Pro Installer Kit is the durable, dependable way to calibrate customers' AVRs in the field. The Pro Installer Kit is compatible with all modern Denon/Marantz AVRs via the Audyssey adapter cable.
